

Workrr Sales Discovery Checklist

A structured qualification and process-discovery guide for finding safe, valuable private AI implementations.

Built for practical private AI

A Cloudflare-native framework and operating application for turning repeatable manual work into governed, measurable AI processes.

Intended audience: Sales, founders, consultants, forward-deployed engineers, and customer process owners

Prepared: July 2026

Status: Working product document - customer language should be validated during discovery.

How to Use This Checklist

Use this guide during a 45 to 90 minute discovery conversation. The objective is not to sell every Workrr feature. The objective is to determine whether one manual process is valuable, bounded, measurable, and owned enough for a pilot.

Mark each item as Known, Unknown, or Blocked. Unknown is acceptable during discovery. Blocked means the pilot should not proceed until the issue has an owner and resolution.

Qualification rule

A good pilot has a real repeated process, a named business owner, representative examples, an acceptable human-control boundary, and a measurable baseline.

1. Company and Strategy

☐	What business outcome is leadership trying to improve this year?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	Why is AI or automation being considered now?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	Who is the executive sponsor and who owns the operating result?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What previous automation or AI attempts exist, and what happened?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What privacy, security, contractual, or regulatory requirements shape the project?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	Does the customer have internal development, IT, security, and operations support?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____

2. Process Definition

☐	What is the process called in ordinary business language?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What event starts the process?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	Who performs it today and for which customer, employee, or department?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What are the steps in the normal path?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What are the most common exceptions and judgment calls?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____

[]	What input arrives, in what format, and from which source?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What output or action marks successful completion?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Which systems are read and which systems are changed?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What work occurs before and after this process?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Who can explain the process when the documented procedure and real work differ?	Known [] Unknown [] Blocked []	Notes: _____ _____

3. Volume, Pain, and Baseline

[]	How many items occur per day, week, or month?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	How many minutes does a normal item take?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	How much time is spent on exceptions, rework, searching, or waiting?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What is the current error, reassignment, escalation, or abandonment rate?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What service-level or turnaround target exists?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What backlog, staffing, customer, compliance, or revenue impact does the problem create?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Can the team provide a credible baseline rather than a rough savings claim?	Known [] Unknown [] Blocked []	Notes: _____ _____

4. Data and Knowledge

[]	What data fields are necessary for the process?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Which data is personal, confidential, regulated, or contractually restricted?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Where are the source documents or records stored?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Who owns source accuracy and freshness?	Known [] Unknown [] Blocked []	Notes: _____ _____

☐	Does output require citations or traceability to a source?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What data must never enter a model, prompt, log, export, or support request?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	How long should inputs, outputs, conversation state, memory, and audit evidence remain?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	Are deletion, legal hold, residency, or customer consent requirements present?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____

5. Decisions and Human Control

☐	Which steps are lookup, drafting, recommendation, decision, or external action?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What can the AI observe without risk?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What can it suggest without taking action?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What exact actions require human approval?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	Who is permitted to approve, reject, request information, or escalate?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What evidence must a reviewer see before deciding?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What actions should never be automated?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What is the worst credible outcome and how would the team contain it?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____

6. Integrations and Tools

☐	Which external systems are required for the pilot?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	Is each interaction read-only or a write action?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	Are APIs, webhooks, OAuth, service accounts, or MCP interfaces available?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____
☐	What scopes and credentials are required, and who owns them?	Known ☐ Unknown ☐ Blocked ☐	Notes: _____ _____

[]	Can repeated actions be prevented with an idempotency key or provider reference?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What rate limits, maintenance windows, or provider outages must be handled?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Is a manual fallback available when the integration is unavailable?	Known [] Unknown [] Blocked []	Notes: _____ _____

7. Agent and Execution Design

[]	Is each request independent, or must it continue a conversation or entity history?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	If state is sticky, what identity key separates threads, consumers, customers, cases, or accounts?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Does work need multiple durable steps, timers, retries, approvals, or schedules?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Can volume arrive in bursts that require a queue?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What temporary working state is needed?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What facts, if any, qualify for governed long-term memory?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What context can be summarized, expired, or retrieved only when relevant?	Known [] Unknown [] Blocked []	Notes: _____ _____

8. Quality and Acceptance

[]	What does a good result look like to the business owner?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What errors are tolerable, reviewable, or prohibited?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Can the customer supply representative normal and difficult examples?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What golden scenarios must every release pass?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	How will citations, structured output, tools, and prohibited content be evaluated?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Who has final acceptance authority for the pilot?	Known [] Unknown [] Blocked []	Notes: _____ _____

[]	What threshold pauses or ends the pilot?	Known [] Unknown [] Blocked []	Notes: _____ _____
-----	--	--------------------------------------	-----------------------

9. Pilot and Adoption

[]	Who are the named pilot users?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	How many users and items are in the pilot?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What training do consumers, reviewers, owners, and operators need?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Where will users start the process and receive assigned work?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	How will feedback and unexpected results be reported?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Who provides first response and what are the support hours?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What is the pilot start, review cadence, and end decision date?	Known [] Unknown [] Blocked []	Notes: _____ _____

10. Value and Commercial Fit

[]	What measured result would justify the pilot?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	How will time returned, quality, turnaround, and business outcome be calculated?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What model, integration, implementation, and operating costs matter?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	What is the customer's acceptable payback period?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	If the pilot succeeds, what related processes or departments could follow?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Is the buyer seeking software, implementation, managed operation, or a combination?	Known [] Unknown [] Blocked []	Notes: _____ _____
[]	Is budget authority present and is the timing real?	Known [] Unknown [] Blocked []	Notes: _____ _____

Pilot Readiness Score

Dimension	0 - Not Ready	1 - Partial	2 - Ready
Owner	No accountable owner	Interested stakeholder	Named owner with authority
Process	Unclear or highly variable	Normal path known	Steps and exceptions understood
Data	Unavailable or prohibited	Some access unresolved	Representative approved data available
Value	No baseline	Rough estimate	Measurable baseline and target
Control	Authority unclear	Review concept exists	Exact approval and stop boundaries defined
Acceptance	Demo quality only	Some examples	Golden cases and accepting owner
Adoption	No users or support	Potential users	Named pilot users and support owner

Scoring Guidance

- 12 to 14: Strong pilot candidate. Confirm commercial scope and implementation plan.
- 8 to 11: Promising, but resolve the lowest-scoring dimensions before committing to production timing.
- 4 to 7: Continue discovery or choose a more bounded process.
- 0 to 3: Do not build yet. The problem, owner, data, or value case is not ready.

Required Discovery Outputs

- One-sentence process purpose and target outcome.
- Current-state process map with normal path and exceptions.
- Baseline volume, time, quality, turnaround, and cost assumptions.
- Named executive sponsor, business owner, technical contact, reviewers, and support owner.
- Data classification, retention, model, integration, and human-control boundaries.
- Pilot users, golden scenarios, acceptance thresholds, stop conditions, and decision date.
- Open questions, blockers, responsible owners, and due dates.
