

workrr one

Palantir-style, cross-departmental decision-making for the mid-market — deployed entirely inside your own cloud, where your data never leaves and never trains anyone's AI.

Your biggest decisions wait on a fire drill

Every month, people from finance, sales, and ops pull numbers out of a dozen systems into spreadsheets to answer questions like **"which customers actually make us money?"** It takes days and several people — and the moment the report exists, it's already out of date. The decision waits on the data.

Stop compiling reports. Start opening apps and deciding.

workrr one connects all your systems into one private, always-live model of your business — resolving the same customer, deal, and dollar wherever they appear — then turns the reports you used to assemble by hand into apps you just **open and decide from**. Every answer shows its sources.

- | | |
|--|--|
| ★ Business Review — the live board/exec report, across every department | ★ True Profitability — real margin by customer, product & project |
| ★ Account Intelligence — churn, health & growth across the book | ★ Quote-to-Cash — where revenue is stuck, end to end |
| ★ Spend & Vendor — total spend, duplicates, renewal exposure | ★ Capacity & Utilization — demand vs. people & time |
| ★ Forecast Reality — a number backed by your own history | ★ + quick wins — search, ask, and read every system on day one |

PRIVATE BY DESIGN

It runs in your Cloudflare account. Always.

- | | |
|--|---|
| ✓ Your data never leaves your own cloud boundary | ✓ Never sent to a model vendor (OpenAI, Anthropic, ...) |
| ✓ Never pooled with other customers or used for training | ✓ Zero Trust access — auditable and revocable |

How it works

CONNECT

Point it at your systems.

Microsoft 365, Google, CRM, ERP, SQL, files — authorized, not rebuilt.

CATALOG

It models your business

automatically — no schemas to design, no pipelines to maintain.

DECIDE

Open the app. Live answers with

sources, in weeks — not the quarters a data project takes.

See your own business, modeled.
